

Managed Google SecOps

Google's Scale and Speed, Fortified by Digital Hands® Expert Security Operations

Your Best Defense Against Today's and Tomorrow's Threats

Security teams are overwhelmed—not just by alerts, but by the noise, complexity, and resource drain of managing multiple tools and platforms. The combination of Google SecOps with Digital Hands' expert SOC addresses these challenges by giving security teams the clear, actionable insights and rapid responses they need to Get There First™, before evolving threats.

How It Works

Results You Can Rely On

For over 20 years, Digital Hands® has delivered peace of mind to mid-sized and large enterprises through proven, high-impact solutions. As Google's partner of choice for Google SecOps implementations, legacy SIEM migrations, and ongoing management, we equip security teams with the solutions they need to stay ahead of evolving cyber threats.

4000+

“Our partnership with Digital Hands was not by chance. We were impressed with their deep cyber expertise, focus on security outcomes in addition to innovative technology, and their vision of the SOC of the future”

– Sunil Potti, Google Cloud Security VP/GM

About Digital Hands

Digital Hands® is a globally trusted, award-winning cybersecurity services provider specializing in managed detection and response (MDR) and managed security services (MSS). For over 20 years, we've helped organizations stay ahead of cyber threats through our veteran security operations center (SOC) and security fabric, CyGuard Maestro™. Built on open-XDR architecture, Maestro allows seamless integration with your existing technology, eliminating the need for costly replacements and delivering response actions precisely when and where you need them. Learn how Digital Hands empowers organizations to Get There First™ at www.digitalhands.com.
